Ústecký kraj

Ústecký kraj

The region possesses a big development potential, according to the location on important European transport axis Berlin-Prague-Vienna and good availability of the City of Prague.

Ústecký kraj

Ústí Region - territory of high
territorial diversity

28.1.2013

Ústecký kraj

Problems: deepening regional differences in demographic development in the quality of living conditions, decreasing availability of work and services in peripheral areas, transport infrastructure and development of services sector.
